

160% Load Capacity for mining application

ETOT III

160% Load Capacity

The double-layer nylon chafer reinforces the tire bead and increase the load capacity to 160%.

Better Retread performance

Ultra high-tensile steel wires reinforces the carcass and increase the retread capacity.

Longer Service Life

Bigger blocks enhance pattern saturation and prolong tire life.

Size	PR	Tread Depth (mm)	LI & SS	Load Capacity (kg)		Max. Load Capacity (kg/%)	Standard Pressure (kPa)	Type
